

TEAM LEADER

OUR PROJECT

Our mission at Innovived is to bring biology and technology together. We aim to establish and contribute to innovative projects within the field of biomedical engineering and to organize events that focus on knowledge transfer to future scientists. We believe that by creating a bridge between biology and technology, applications with great potential are made possible. The main focus during the coming year(s) lies on creating innovative applications in the life sciences sector with the aid of 3D printing technologies on the one hand and the organisation of educational STEM activities for pupils on the other hand.

THE FUNCTION

As a team leader your main responsibility is to create a vibrant environment that stimulates your team members to reach their full potential. This means that besides coaching them, establishing a close relationship with your fellow students in order to cultivate their hidden talents is just as important. Also keeping an overview of the project(s) and redirecting where necessary will belong to your tasks as team leader. This will include, among others, guiding your team through obstacles that will arise along the way but also keeping the overall harmony in your team. A handy tool in order to achieve these objectives is through frequent meetings of which you will be the chairman. This enables you and your team to address certain problems that may occur and evaluate the direction Innovived is heading.

YOUR PROFILE

- | | |
|--------------------------------|------------------------------|
| ☒ Communicative | ☒ Delegation and empowerment |
| ☒ Decision making capabilities | ☒ Accountability |
